“I want to show that we are those who must learn to live beside him (Down Syndrome child), to accept him like he is, different but essential, profound and extremely human, to accept him as a brother.

If they are accepted and considered, if they are seen as they really are, they will grow, will become responsible and trustworthy, best friends of those in the community they live in .”

“To help them through love”
THOMAS J. WEISS

ADOR

DOWN ASSOCIATION
ORADEA – ROMANIA

“IEDERA” DAY CENTER
FOR THE CHILDREN

*“Blessed is the one,
Who loves and respects me,
As I am.”*

Who are we?

We are a parental organisation of Down Syndrome children, supported by doctors, geneticists, psychologists, teachers.

We all work as volunteers.

What is Down Syndrome?

Named after John Langdon Down, the first physician to identify it, Down syndrome is a chromosomal disorder caused by an error in cell division that results in the presence of an additional third chromosome 21 or "trisomy 21."

It is incurable, the only medicine is the permanent care, education, love and consideration from early ages.

What is our goal?

- A better life for the child and the family
- A successful integration of the children in the family, school, society.
- Improving living conditions of those with Down Syndrome and their families

ADOR's Programme

People with DOWN Syndrome are assisted according to age categories:

- children (preschool and school)
- parents

What do we offer?

It is a ADOR project for children with Down Syndrome.

In a safe environment they gain a certain autonomy and become more independent.

Daily schedule: 4 hours.

We seek rehabilitation throughout non-medical therapy.

Our activities are:

- Ergotherapy:
- Early intervention
- Speech
- Psychological counseling
- Psychomotor therapy and manual skills
- Learn therapies
- Music therapy
- Play and relaxation

Sport activities:

- Applied trails
- Table tennis
- Bocce
- Bbасchetball

We have 20 beneficiaries in this program, with age between 1-18, from the family, kindergarden and schools.

Their rehabilitation is assisted by specialists: an psychologist and a social worker.

During holidays they take part in camps, go on trips, hiking.
